

CRISP FOOD CONTAINER

HEAT RETENTION & TOLERANCE

Anchor's Crisp Food Containers retain internal product temperature better than any other disposable crisp food container, which assists in meeting local health department regulations. Withstands temperatures up to 240°F when placed in warming unit displays and under heat lamps.

STACKABLE

Advanced engineering provides structural integrity to allow positive stacking in the display case and in the customer's bag.

"CRISPNESS" MAINTAINED

Exclusive patented Convection Cross-Flow® ventilation design incorporates unique venting to relieve moisture and condensation. An anti-fogging lid provides excellent product visibility, even under the hottest temperatures. Raised airflow channels function to keep grease and moisture away, ensuring that your fried foods remain crispy. Independent studies at leading retailers demonstrated this unit outperformed the leading fried chicken container. Better texture, better tasting fried foods.

MERCHANDISING & ORDER ACCURACY

Clear lid provides excellent product visibility, while the black base showcases the food and conceals juices and purge. Holds up to 4 large pieces of chicken, as well as a variety of other fried food items.

The new 6" x 9" size adds more convenience for individual take-out.

RE-USABLE, RECYCLABLE

Microwave and Dishwasher-Safe. Made of recyclable  polypropylene. Can be reused numerous times by your consumer and is preferred for recycling nationwide.
