Home Delivery is growing faster than
both e-commerce and restaurant
industry, creating a need for solutions
for restaurants.
The Challenge: Restaurant food must
keep up with Home Delivery.

Anchor Packaging's new Crisp Food Technologies® Containers
is a perfect fit for restaurants looking for a new "go-to" solution. These
microwavable, reusable, and recyclable containers are designed to keep food
hot and crispy for 30 minutes or longer. They are also easy to use and
store, making them a perfect fit for restaurants looking for a new
solution. This line was designed for the restaurant industry to address challenges
associated with home delivery.

Availability of shapes and sizes - 21 Hinged and Two-Piece Black
Heat-Resistant Plastic with a Hinged Lid for 30-Minute Delivery.

• Improved Food Presentation & Your Brand Image • Microwavable
• Maintain Food Quality Under Heat Lamps • Secure Closure Eliminates Messy Spills
• No-Fog Clear/Lid Avoids Leaks • Recyclable Containers

Home Delivery is growing three times faster than drive-thru and takeout, creating technical and operational issues for restaurants. One Challenge Solved: No More Soggy or Cold Fried Foods!

Leaders in Home Delivery Use Crisp Food Technologies® Containers

A patented family of packages currently in use at over 12,000 locations. Chain report results that surpass any other packaging alternatives. Originally developed to keep fried chicken hot & crisp in supermarket displays for up to 4 hours, this line was adapted for the restaurant industry to address challenges associated with home delivery.

Variety of shapes and sizes – 21 Hinged and Two-Piece SKUs

Fried Foods Remain Hot & Crispy for 30-Minute Delivery

Even When Stacked

Clear No-Fog Lids Avoid Errors

The Intersection of Food, Technology & Mobility

No More Cold or Soggy Fried Foods
No Need to Rush the Delivery
Anchor Packaging® Containers

Food On Demand Expands Coverage, Enters New Markets

Business change is the new normal for restaurants and retailers in the golden age of 20th-century convenience. Delivery, pick-up, and dine-in are growing brands and restaurants are all embracing technology to keep things moving in their own space, and we're proud to be helping them do it. From the point of order to the point of delivery, we're helping them do it. From the point of order to the point of delivery, we're helping them do it.

A Third From Our Quarter

Three Home Delivery Leaders Do It Right

As consumers become more sophisticated with their food choices, an increasing number are choosing delivery over the on-premise experience. Delivery gives these consumers the convenience of drive-thru or takeout. The double-digit growth is expected to continue for the next few years.

Franchise 500® Practice Closing Outdoors "Shutouts" By Tony Kibler

As many chain restaurants face fall or waning traffic, Franchise 500® shutouts

These Home Delivery Leaders Do It Right

As consumers become more sophisticated with their food choices, an increasing number are choosing delivery over the on-premise experience. Delivery gives these consumers the convenience of drive-thru or takeout. The double-digit growth is expected to continue for the next few years.

Wendy's

Delivery coverage reached 100% of the Wendy's locations at the end of Q3 2018 and is expected to grow to 100% by the end of the year. Wendy's national advertising continues to drive awareness of delivery, and increased delivery volume has resulted in higher average check sizes from 15 to 20 minutes to 25 to 30 minutes.

Red Robin

Thanks to our innovative drive-thru and delivery, restaurants are fast to adapt to the new paradigm of home delivery. As a result, we've seen a significant increase in delivery volume.

Wendy's

Wendy's delivery volume has grown by more than 30% over the past year, according to the new outlook. This is due to the fact that Wendy's has a strong delivery and take-out

Problem Solved!

Perfect for burgers, sandwiches and smaller portions.

6" CULINARY BASICS™ HINGED CONTAINERS

The new Culinary Basics™ 6" x 6" hinged containers are available in all-clear and in black base/clear lid. Both options are made of sturdy polypropylene (PP) to withstand temperatures to 230°F, vented to allow steam to escape, and feature the consumer-convenient tear-away lid for easy eating on the go. The one-hand, quick close will keep the kitchen running smoothly and are excellent alternatives to foam clamshells which keep food hidden and create messy spills.
