

# Think Outside The Box Lunch

Gourmet Classics™  
GC900D

MicroRaves®  
M713

## Anchor has the right packaging for a more profitable lunch program

### RESEARCH SHOWS WE CONSUME FIRST WITH OUR EYES.

It's all about the presentation. Imagine the difference in customer reaction when they view your culinary creations in a glossy tuxedo black base. The clear lid, with integral anti-fogging technology, ensures that excellent presentation, every time. Polystyrene foam, paper, and foil lids don't offer a "clear" view of your food. *A better customer experience means more repeat sales and more referrals.*

**HOT OR COLD.** MicroRaves & Culinary Classics/Basics are heat-tolerant and withstand temperatures up to 230°F when under heat lamps or placed in hot boxes. Gourmet Classics are designed to keep cold foods cold and fresh, down to 20°F.

**DURABLE & LEAK-RESISTANT.** Made of materials that are cut and puncture-resistant. Crack-resistant even if dropped. Leak-resistant closures that keep juices inside, not outside the packaging. Eat right out of the container with knife, fork and spoon.

**SUSTAINABILITY.** MicroRaves & Culinary Classics are made of  polypropylene. Microwave-safe. Dishwasher-safe. Consumer-Reusable and recyclable. Gourmet Classics are made of  PET, the most commonly recycled plastic.

For more information, visit [anchorpackaging.com](http://anchorpackaging.com) and click on the WHERE TO BUY tab to find the sales person nearest you.

*Better dining experience. Better sales (and repeat sales). Better order accuracy too.*
