ⓃNon-stocking. Call for lead times.

## ULTRA WRAP™ Films

Films offer softer feel while providing greater yield per roll. Improved stretch-ability reduces physical strain associated with hand wrapping. Meat films contain minimum 5% epoxidized soy bean oil (EXBO) reducing the amount of oil-based PVC resin used. Cores are manufactured with 100% recycled paperboard and designed to keep the film rolls in place during shipment. Corrugated pads add extra protection when stacking rolls to eliminate crushed ends.

### Premium Grade

Stretch film ideally suited for overwrapping meat and produce on high-speed automatic stretch wrapping equipment at supermarkets and processors.

### Superior Grade

Premium, high-yield stretch film designed for packaging fresh meat in supermarkets using automatic wrapping equipment.

### Stretch & Miler® Grade

Economical, high-yield stretch film designed for packaging fresh meats in supermarkets using hand wrap or automatic equipment.

### Produce Grade

Economical, high-yield green tinted stretch film used on hand-wrapping equipment for packaging fresh produce. High gas transmission helps keep produce fresh.
